FastReport.Q: Implementing StepUpDateChange in PrimeFaces Is it possible to add a stepUp/stepDown function to the calendar component in PrimeFaces? I don't see anything under the "Calendar" menu or in the documentation, but perhaps there's something I'm just not seeing. A: Try using a custom renderer. PrimeFaces calendar doesn't have a stepUp/Down method of date change, but you can create your own renderer to output the appropriate HTML. Here is an example of how to write a custom PrimeFaces renderer. The renderer would override the calendar_cellEditor method. Q: Java get first or second occurrence of a duplicate string in a collection I have a collection of data of car insurance class Insurance { private String person; private Double price; private String car; ... } I have a map where String is Insurance name I need to extract Insurance that has price cheaper than previous one (for example first or second cheapest one, second if not cheaper) I'm doing it via for loop (or map.forEach) but I think there's something smarter. A
