Q: Independence and the Kronecker product I've just read a very simple and elegant proof of the following identity involving a Kronecker product: $\langle f \otimes g, h \rangle = \langle f, h \rangle \langle g, h \rangle$ where $f, g, h \in \mathcal{H}$ with \mathcal{H} a Hilbert space. I would like to be able to understand why it is obvious, if anyone knows, and if anyone has a reference, I would be very happy to read it. A: The definition of the Kronecker product can be written as $f \otimes g = f g^T$ (note the transpose). Thus, we have $\langle f \otimes g, h \rangle = \langle f g^T, h \rangle = \langle f, h \rangle \langle g, h \rangle$.

The Tag in the semicolon-delimited.html document, caused the problem. Everything has been working fine until recently. I went to the site and some times the picture goes up, for a few seconds. Then when it does come up, the image doesn't show up. Its only been like this the last few weeks. I looked up the tail of the picture, which is a reference number, in the folder that had the picture. It was fine there. Any ideas? Thanks A:
